

How do I whitelist for OddPost?

With Oddpost, you can exempt our emails from filtering by flagging it as "Not Spam". Unfortunately, you can only do that if itâ€™s been misidentified as spam at least once.

- » Search your Probably Spam folder for an e-mail from us.
- » If you find one, select it.
- » Click Move to Inbox and Mark as Not Spam.
- » That should prevent future misidentifications.

Thanks for whitelisting Resale Enterprises.
