Netscape will reliably deliver any message from an address in your Address Book to your inbox. So, you€™ll need to add our From address as a Contact in your Address Book.

- » First, get the From address from your most recent email from us.
- » Open your Address Book.
- » Click Add Contact.
- » Type or paste the From address from your most recent email from us into the Other e-Mail box.

- » Make sure to click the radio button marks this as our primary e-mail address.
- » Click Save.

That should do the job. Thanks for whitelisting Resale Enterprises.
