How do I whitelist for OddPost?

With Oddpost, you can exempt our emails from filtering by flagging it as "Not Spam". Unfortunately, you can only do that if it's been misidentified as spam at least once.

» Search your Probably Spam folder for an e-mail from us.
» If you find one, select it.
» Click Move to Inbox and Mark as Not Spam.
» That should prevent future misidentifications.

Thanks for whitelisting Resale Enterprises.
