If you want our emails to reliably get past Spam Sleuth, youâ€™ll need to exempt it from the filters. You do this by adding our From address to your Friends list.

- » First, get the From address from your most recent email from us.
- » Open Spam Sleuth.
- » Open the File menu and select the Configure option.
- » Find the Friends category, and select Active.
- » In the space provided for the list of friends, make a new, blank line.
- » On this new line, type or paste the From address from your most recent email from us.
- » Click OK.

Thanks for whitelisting Resale Enterprises.
