SpamEater will reliably deliver our emails to the inbox if you exempt it from SpamEater's filters. To do that, you have to add us to your list of Approved Senders.

  » First, get the From address from your most recent email from us.
  » Find the SpamEater sidebar and click Filters.
  » Click the Approved Senders tab.
  » Choose Add Filter.
  » Type or paste into the Address space the From address from your most recent email from us.
  » For Address Type, select Full E-mail Address.
  » Click OK to finish.

Thanks for whitelisting Resale Enterprises.
