How do I whitelist for SpamKiller?

McAfee's SpamKiller uses filters to keep unwanted messages out of your incoming e-mail. To get our emails, youâ€™ll need to exempt it from SpamKillerâ€™s filtering. To do that, you add our From address to your list of Friends. There are two ways to do so.
The easy way:

> » Find a message thatâ€™s from us, either in your Inbox or your Killed Mail list.
> » Select that message.
> » Click the Add Friend button.

The slightly harder way:

> » First, get the From address from your most recent email from us.
> » In the SpamKiller sidebar, select Friends.
> » Click Add.
> » Type or paste into the supplied space the From address from your most recent email from us.
> » Click the OK button.

Thank you for white-listing us.
