We are happy to showcase your products on our website.

We can joint venture your products in one of two ways.

» Create your products, create an affiliate program for that product (free resources like paydotcom.com can help), create a banner (this is best if 120 x240), and i will place in on our site with our link embedded. We can use a text link as well, but expect sales to be significantly less.

» Hand over your product to us, we will sell it on our website, and each month send you the 50% split via PayPal. There are two drawbacks..... First, you have no way of tracking the sales, you must rely on us for accurate reporting. Second, Our catalog is based on wholesale pricing, so we will be selling from there for a much reduced price.
