This is very simple once you know how...

First, get yourself a PDF Creation software. If you want a really good one, just go to <http://www.pdf995.com/>, and it's 100% free.

- » Install your PDF software
- » If you are using MS Word, then open the document in Word (this can be .rtf documents as well).
- » Edit the document however you plan too.
- » Click on (top left of MS Word) File>>Print
- » Select "PDF SOFTWARE" as your printer. If using above software it will be "PDF995"
- » This will print the document as a PDF only (No paper), and you have your new eBook.

Note: There is a free PDF creation software at www.pdf995.com that you can also download for securing your document and other things..
