If you are looking to gain an exclusive foothold in the ClickBank Marketplace, we recommend that you focus your resale product purchases to private label rights "(PLR)" products. These you can rename and alter in any way that you like.

You may however need to have a designer create your ecover and salespage graphics for your newly renamed product.

Alternatives to hiring a designer are using your own software. If you would like a few recommendations, try these...

<http://www.trueboxshot.com/>

<http://www.webgraphicscreator.com/>

and of course there are the much more expensive Adobe Photoshop software suite of programs.
