Do you surf the internet, listen to the radio, or watch television? If you do, there is a good chance that you have heard of MySpace before. MySpace is an online social networking website that has literally taken the world by storm. This is because, in what seemed like no time at all, MySpace has grown to become one of the most popular online websites, in the entire world.

The first step in joining this popular online social network is to register for an account. This can be done in a matter of minutes. Although you can view a number of different MySpace pages without registering, it is advised that you do. Registration will allow you to not only create your own MySpace page, but enjoy many of the other features that can be found on the site. What you may like most about MySpace is that it is completely free to use.

Once you join MySpace, you can create your own profile page. Although this is optional, it is the best way to communicate with others and make new friends. To make the experience easier, MySpace has a fairly large collection of profile templates. These templates not only have an impact on the background of your profile page, but the text fonts as well. In addition to using the pre-designed templates, you can also create your own, especially if you have basic knowledge of HTML.

Many MySpace users have sections that allow them to describe themselves and their likes and dislikes. In addition to these preset sections, you can also add your own. A large number of users have posted clips from their favorite movies, television shows, or music videos. You can also add your own pictures and your own videos, if you choose to do so. Although MySpace does have some rules, which can be found in their terms of use agreement, you basically have unlimited freedom, when it comes to creating your own MySpace page.

After you have created your own MySpace page, you can easily search for others. You can search for others with a wide variety of different keyword phrases. If you are looking for someone who lives near you, you can search for your town. If you are looking for someone who shares your love of animals, you can search for pet lovers. Once you have found the MySpace page of someone who you would like to become friends with, you can invite them to join your network. In addition to inviting others to join your network, there is a good chance that you will be invited to join others.

Although MySpace has been in the media because of its popularity, attention has been given to the popular social networking website, attention it probably didn't wish that it had received. With MySpace, as well as a large number of other networking sites, internet safety has become a big issue, especially with children. If you are the parent of a child, you may wish to monitor their MySpace activity or ensure that their profile is set to a private listing. MySpace has a number of safety features in place, but to make use of these features you must know that they exist.

In addition to being a traditional social networking website, one that lets you meet and speak to other members, MySpace is well known for its additional features. These features commonly include music videos, horoscopes, chat rooms, careers, and instant messaging. If you are interested in using these features, as well as the many others that can be found on MySpace, you are

encouraged to register for your free membership today. You can do this by visiting www.myspace.com.
