Being prompted for State - Province at checkout with Master-resale-Rights.com

We are truly sorry for anyone having this issue. We have had our shopping cart developers looking into this issue and has of yet only told us that if you (the customer) happened to be using Internet Explorer 6 or earlier while browsing our store, this may be causing the problem.

If by chance you are using Internet Explorer 6, the latest version is version 8 you can get it from Microsoft here:

<http://www.microsoft.com/windows/internet-explorer/default.aspx>

If you are using a more current browser, or another browser all should work ok.

We are continuing to investigate this problem, and will post our updates here:

<http://resalesupport.com/>

Again, our sincerest apologies for any inconvenience this has caused you.
